To whom it may concern

Hello,

I am a passionate engineer with 9 years of experience in writing performant and organised code. My areas of expertise are JavaScript, TypeScript, Angular, React and Node JS and related frameworks related to these technologies.

I am currently working as an Associate Engineer in AQR Capital Management, Bengaluru, India and responsible for handling the frontend architecture of portfolio implementation & analytics team. I am also a member of JavaScript working group and UI team which are horizontally spread. I believe that the skills and experiences I have gained make me an ideal candidate for the job of Full Stack Engineer / Frontend Engineer / JavaScript Developer.

I am a citizen of India and hold a permanent resident visa of Australia (subclass 189). I am actively seeking opportunities in Australia and can make myself available in 6-8 weeks. Look forward to speaking with you and discussing my qualifications in more detail.

Sincerely,

Rachit Garg
